| 13:30-13:45| Student Seminar | Vu Do Uyen Vy  
Factor IX Gene Mutations in Vietnamese Patients with Hemophilia B                                                                                           | University of Medicine and Pharmacy, Ho Chi Minh City |
| 13:45-14:00| Student Seminar | Ngo Thai Bich Van  
Phospholipase D2 is a Key Molecule to Suppress Tumorigenesis by Regulating Proliferation of CD8+ T Lymphocytes                                                                 | University of Tsukuba                            |
| 14:00-14:15| Student Seminar | Tran Minh Huy  
Methylation Status of MGMT Promoter in Vietnamese Patients with Glioblastoma                                                                                     | University of Medicine and Pharmacy, Ho Chi Minh City |
| 14:15-14:30| Student Seminar | Luong Cong Nho  
9,10-Phenanthraquinone-Generated Reactive Oxygen Species Activate Epidermal Growth Factor Receptor Signaling Pathway in A431 Cells | University of Tsukuba                            |
| 14:30-15:00|               | Break                                                                                                                                         |                                                  |
| 15:00-15:30| Faculty Seminar | Chair: Koji Hisatake, University of Tsukuba                                                                                                                                           |                                                  |
| 15:00-15:30| Faculty Seminar | Hoang Anh Vu  
Molecular aspects of cancers in Vietnam                                                                                                                                       | University of Medicine and Pharmacy, Ho Chi Minh City |
| 15:30-16:00| Faculty Seminar | Phan Thi Xinh  
Molecular aspects of hematological malignancies in Vietnam                                                                                                                   | University of Medicine and Pharmacy, Ho Chi Minh City |
| 16:00-16:30| Faculty Seminar | Nguyen Thi Quynh  
The present status of medicinal plants in production of medicine in Vietnam                                                                                     | Institute of Tropical Biology, VAST              |
